

Mexico, January 31, 2018

Dear Dr. Romanelli:

By means of this, we wish to inform you of the COMLHEI secretariat about the success achieved during the XI Congress Amcichac and I Congress COMLHEI, a pity for the interferences produced as a result of the earthquake in Mexico City during those dates; due to the representatives of Puerto Rico, the Dominican Republic and Ecuador, not how to attend.

We had 30 presentations, included in the **Symposium Tendencies in Wound Management** on 22/09, **Symposium of Multidisciplinary in Wound Clinics** and the **Symposium: Healthcare personnel in wounds, stomas and incontinence in Latin America**, both they noticed the day 23/09.

We had the realization of our Board. In addition to the COMLHEI Assembly with its partners where the results of the objectives proposed in Mexico were evaluated in 2015.

In addition, our leaders collaborated with Amcichac to hold conversations within their program and cover some professionals who could not attend due to the earthquake that occurred.

Adjunct next table with participations and presentations.

A greeting,

Lupita Lobo Cordero
President COMLHEI

Carmen Elena Ruiz Henao
Secretary COMLHEI

Table Participation of COMLHEI in AMCICHAC
